Homepage overview

View license performance and generated incentives.

The screenshot shows the UNETWORK mobile app interface. At the top, there's a status bar with the time 11:19 and a bell icon for notifications. Below the UNETWORK header, the 'Total Network Incentives' section displays a large number '44,176' with a coin icon. The 'Earnings' section shows 'Today' with '0' and 'Last 7 Days' with '1,0962', both with coin icons. The 'Proof of Work' section includes 'Service Status' (Active), 'Switch Node' (Connected), and 'Validation Node' (Connected). Below this, a 'License' section shows 'License' (0x06...a81c), 'Lease' (until 07/11/2026 09:51), and 'Required Uptime' (50.00% / Daily). The 'System Feed' section at the bottom says 'No notifications yet.' The bottom navigation bar has five icons: Home (house), Licenses (key), Messaging (speech bubble), Task (checklist), and Menu (three dots). Annotations with arrows point to these elements: 'Tap here to see your alerts and notifications' points to the bell icon; 'Total network incentives generated' points to the '44,176'; 'Network incentives generated today' points to the '0'; 'Network Incentives generated last 7 days' points to the '1,0962'; 'License status' points to the 'Connected' status; 'Overview of license specifications and required uptime' points to the license details; 'Home' points to the home icon; 'Licenses' points to the key icon; 'Messaging' points to the speech bubble icon; 'Task' points to the checklist icon; and 'Menu' points to the three dots icon.

Licenses tab overview

View your licenses and their terms.

Minimum Uptime

This determines the minimum time your device must be online to keep the license active. For example, 30% means your device should be running at least 30% of the time.

Distribution

Incentives earned are split between you, the License Operator (ULO), and your Node Operator (UNO). The higher your split %, the greater your network incentive.

Lease Duration

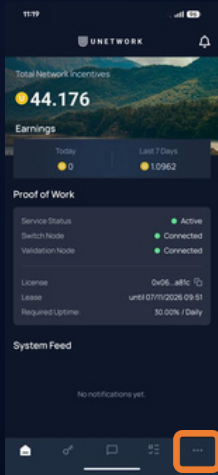

This shows how long you can operate the license. A longer lease provides more time to perform verification tasks and receive network incentives.

1. Go to the License tab.
2. Click the dropdown to get license details.

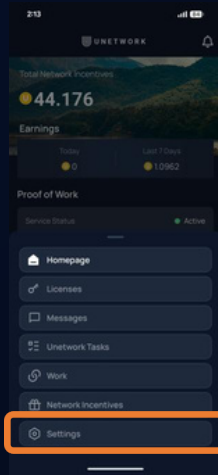

In-app messaging

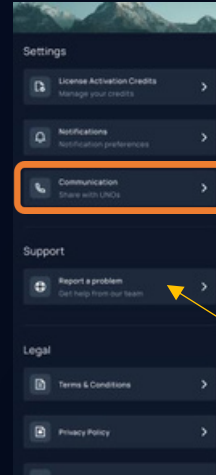

Opt-in & out to in-app messaging to send and receive messages.

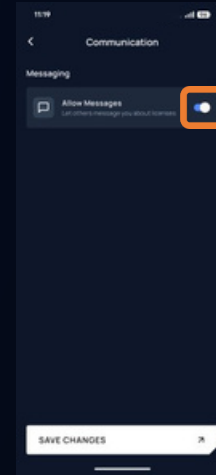

Go to the Menu tab.

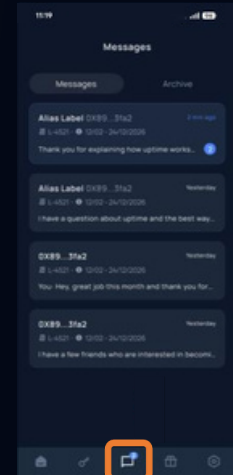

Click Settings.

Tap Communication.

Toggle on “Allow Messages” to opt-in to messaging.

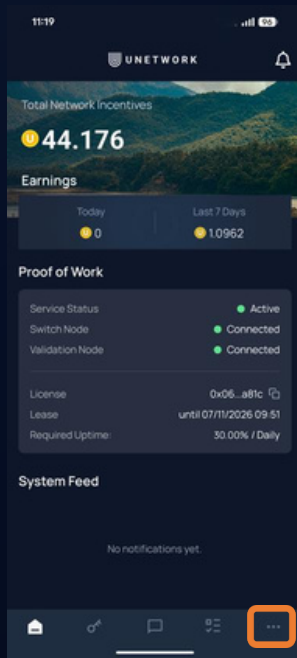

Go to Messaging tab to send messages to the Node Operator.

The Node Operator is the owner of your Unetwork app license. Once you and your Node Operator enable messaging you can exchange messages. Please note that the Node Operator does NOT handle software issues. For software issues, go to Settings and submit a support ticket.

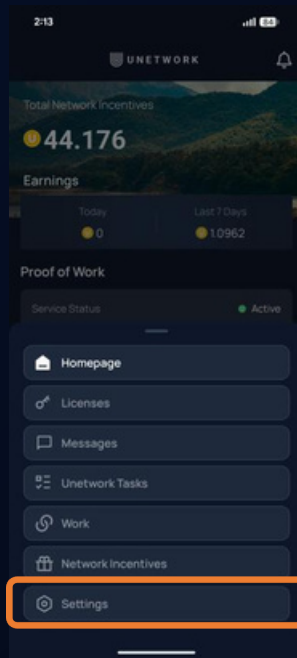

Settings overview

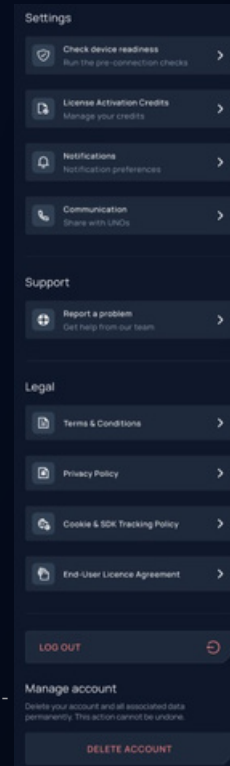

Manage preferences and read app terms & policies.

Go to the Menu tab.

Click Settings.

Run device diagnostics

Manage your activation credits. Credits are currently deactivated.

Set your notification preferences.

Opt in & out of in app messaging.

Submit a support ticket.

Read app terms & policies.

Log out.

Delete account. This is permanent. Your account data, licenses, and rewards history will be permanently erased.
